“Helping Men Give and Get All the Love They Can”

(Date and Time)

Description:

In this course we will look back to 1972 to experience or re-experience the stereotypes and barriers facing women before the great improvements spurred by the women's movement. Next, we'll experience the stereotypes and barriers facing men today and learn how they, too, can be challenged. Attendees will also consider the ways in which they might be colluding, even unconsciously, in using those stereotypes to justify dealing with men adversely. With a new perspective and fresh insights we'll then brainstorm and examine ideas for improving our programs and services to help men give and get all the love they can.

Learning Objectives:

1. Recognize whether and how your professional practice has been influenced by seven major stereotypes about men and fathers, and discuss research and concepts that challenge those stereotypes.
2. Articulate a new conceptual model of power between the sexes and its implications for enhancing balance, respect and fairness between women and men, and for strengthening families and communities.
3. Strategize for the design and implementation of “Responsive to Fatherhood” and other male-friendly programs.
4. Critically examine the male-friendliness of our agency and participate in informed discussions about whether and how it needs to be improved.
